PROFILE

Web Developer Enthusiastic Web Developer skilled in HTML, CSS, JavaScript, and React.js, dedicated to creating responsive, user-friendly websites. Focused on clean, maintainable code and intuitive UI/UX design. A quick learner and team player, always ready to embrace new technologies and enhance user experience.

PROJECT

FoodieHub – Restaurant Landing Page Developer

- Designed a responsive restaurant website using HTML, CSS, JavaScript, and Bootstrap.
- Added interactive features like image carousel, smooth scrolling, and hover effects.
- Focused on mobile-first design for seamless user experience across all devices.

DailyToDo – Task Management App Developer

- Built a task app using JavaScript and Bootstrap for adding, deleting, and completing tasks.
- Used Local Storage API to save tasks across browser sessions.
- Designed a clean, responsive UI with Bootstrap cards and buttons.

MovieTime – Movie Search App Developer

- Created a movie search app using JavaScript and the OMDb API for real-time data fetching.
- Displayed results with movie posters and details in a Bootstrap-based responsive layout.
- Implemented a live search feature for dynamic and user-friendly interaction.
